

# Protective Factors in the Development of Early Conduct Problems

Daniel Shaw, PhD  
University of Pittsburgh

Friday, Sept 27<sup>th</sup>, 12:15-1:15

OSU Tulsa  
North Hall, Room 150

At the conclusion of this seminar participants will be able to:

1. Have a working knowledge of protective factors associated with the development of young children's early conduct problems;
2. Understand mechanisms by which individual protective factors may protect at-risk children from developing early problem behavior;
3. Understand how protective factors across child, family, and community domains may independently and cumulatively contribute to a desisting pattern of early conduct problems.

*Seminar Series co-sponsored by*

Center for Family Resilience, OSU-Tulsa  
& OSU Center for Health Sciences
